

Teleflex Environmental Statement

Teleflex recognizes the importance of environmental sustainability. Teleflex is committed to conducting business with due care and regard for the environment and towards continual improvement. Environmental sustainability is managed within Teleflex as part of our larger Corporate Social Responsibility (CSR) program with leadership and direction from our CSR Steering Committee.

To minimize the environmental impacts of our activities and products we shall:

- Comply with applicable environmental regulatory, policy and compliance requirements.
 - Maintain robust governance to ensure delivery of stated environmental objectives and targets.
 - Align our environmental objectives and targets with the relevant United Nations Sustainable Development Goals.
 - Align our execution strategy with Teleflex's sustainability targets for energy, emissions, water, and waste.
 - Align our emission reduction targets with science and take steps to meet those targets.
 - Embed environmental considerations into our business strategy and actions.
 - Take steps to prevent pollution, reduce waste, support the circular economy and minimize resource consumption.
- Integrate environmental considerations into R&D and new product development.
 - Educate and encourage employees to support the implementation of this strategy.
 - Encourage and support suppliers to meet our environmental objectives and targets through setting and achieving their own targets.
 - Support our customers to meet their environmental objectives and targets.
 - Encourage and enhance biodiversity and ecology protection.
 - Measure and report on environmental progress both internally and across our supply chain.

This statement will be reviewed and updated as necessary to ensure alignment with the CSR strategy.
